Unisem Batam Receives 2015 Best Quality Award from Elmos Semiconductor

Kuala Lumpur, 7 March 2016 – Unisem’s Batam factory was recently honored with the 2015 Best Quality Award from its valued customer Elmos Semiconductor. Elmos is a leading manufacturer of analog mixed-signal semiconductors and their products are used in almost all vehicles. This award recognizes the outstanding quality of service and support Unisem has provided to Elmos.

“On behalf of the entire Elmos team, I like to congratulate you for being awarded the ELMOS quality award 2015. Unisem received this awarded from Elmos because of your outstanding and continuous quality in supplying assembly services. Unisem achieved the highest assembly yield score among the ELMOS assembly providers in 2015. This result was made possible because of the highly engaged management and operation team at Unisem. ELMOS appreciates the cooperative and successful partnership with Unisem that we have shared over many years.

Upon receipt of the award, Mr. Allan Toriaga, COO of Unisem Batam commented, “We are honored to receive this award from Elmos Semiconductor. Over the past 20 years we have built a strong partnership with Elmos and this award is evidence that we continue to provide them top quality service and support.”

About Unisem

Unisem is a global provider of semiconductor assembly and test (OSAT) services for many of the world's most successful electronics companies. We offer an integrated suite of packaging and test services such as wafer bumping, wafer probing, wafer grinding; a wide range of leadframe and substrate IC packaging; wafer level CSP; and RF, analog, digital, and mixed signal test. Our turnkey services include design, assembly, test, failure analysis, and electrical, mechanical, and thermal characterization and modeling. The company has factory locations in Ipoh, Malaysia; Chengdu, People's Republic of China and Batam, Indonesia. Unisem is headquartered in Kuala Lumpur, Malaysia.
