

UNISEM'S CLIMATE CHANGE COMMITMENT STATEMENT

UNISEM recognizes the critical importance of addressing climate change. As a leading entity in the semiconductor industry, we acknowledge our role in mitigating the impacts of climate change and in contributing to a sustainable future. This statement outlines our commitment to achieving carbon neutrality by 2050. We will actively work to reduce our direct and indirect emission intensity in the medium term, with the ambition of reducing absolute emissions in the long term.

1. Renewable Energy Integration:

We will explore all avenues to progressively transition towards a predominantly low-carbon energy supply. We will adopt on-site renewable energy generation options and collaborate with ecosystem partners to support the transition to clean energy sources.

2. Energy Efficiency and Conservation:

We are committed to implementing energy-efficient technologies and practices across all aspects of our operations. This includes investing in efficient cooling systems, optimizing lighting, solar power and ventilation systems and continuously adopting efficient manufacturing processes. Our aim is to achieve continuous improvement in energy intensity metrics.

3. Sustainable Supply Chain Management:

UNISEM will work closely with our suppliers to encourage and support their adoption of sustainable practices. We will prioritize suppliers with strong environmental commitments and work collaboratively to minimize the environmental impact of our collective operations.

4. Water Stewardship:

We recognize the importance of water conservation and responsible water management. UNISEM will implement strategies to reduce water consumption, improve water recycling and reuse, and protect local water resources in areas where we operate.

5. Innovation for Climate Solutions:

We will continuously explore innovative technologies and solutions that have the potential to reduce emissions, enhance energy efficiency, and address climate-related challenges. We will actively seek partnerships with innovative service providers and other organizations to accelerate the deployment of climate-friendly technologies.

6. Employee Engagement and Education:

We will engage our employees by providing education and training on climate change, sustainability, and the role they play in achieving our climate goals. This includes opportunities for employees to contribute their ideas and expertise to our sustainability initiatives.

7. Transparency and Reporting:

We are committed to reporting our progress towards achieving our climate goals transparently. We will continue to measure and publish relevant indicators for the information of all stakeholders as well as implement evolving regulatory recommendations on climate-related disclosures.

UNISEM is fully dedicated to combatting climate change and contributing to a sustainable future. Through the implementation of this Climate Change Commitment Statement, we aim to lead by example in the semiconductor industry, inspiring positive change within our sector and beyond.
